Karen Lim at 852-65280647 or karen@leadershipinc.com.cn
Mark Pixley at 9132-8830 or mark@leadershipinc.com.cn

You are invited:

You are invited to participate in **An Executive Summit on CREATING CHANGE IN LARGE SCALE ORGANIZATIONS with Harrison Owen, Originator of Open Space Technology.**

This program will explore the challenges of bringing about change in large scale organizations and create a forum for interactive sharing of our understandings, issues and learning about creating change in organizations.

Whether a corporate organization, a government department, or in relation to a larger social issue, the complexity of the situation starts to overwhelm our capacity to effectively deal with the situation. Typically, we attempt to deal with our multiple dilemmas by trying harder to do more of what we have always done to maintain control.

Leveraging the Power of Self-Organization

It is being recognized that all systems (and organizations) are essentially self-organizing. By leveraging the power of self-organization it is possible to release passion and responsibility which allow innovation and high performance.

Harrison Owen is a global thought leader on organizational transformation. He will share his current insights while inviting us to dialogue on our situations and challenges.

About Open Space Technology

Create inspired organizations, where ordinary people work together to create extraordinary results with regularity

Open Space Technology (OST) is an innovative meeting methodology for organizational transformation, as well as a philosophy towards how complex organizations develop and self-organize.

In Open Space meetings, participants create and manage their own agenda of parallel working sessions around a central theme of real importance. With groups of 5 to 1000 participants, the common result is a powerful connecting of people, sharing of what is happening in the organization and strengthening of a common vision. Open Space Technology has the potential to transform organizations.

Who should come?

- Leaders, managers and facilitators working with very complex issues, requiring the cooperation of diverse stakeholders, and where there is an urgent need for action.
- Anyone who is looking for a way to get beyond business as usual and seek innovation and high performance on our most important issues and opportunities.

Facilitators:

Harrison Owen is the originator of **Open Space Technology**. He is a leading consultant and theorist on organizational culture and transformation. He has worked with a wide range of organizations including national and multi-national corporations, governments agencies, NGOs, health, educational and religious institutions. He has authored many books on leadership and organizational development including **OPEN SPACE TECHNOLOGY: A Users Guide** and his most recent book **Achieving High Performance: Leveraging the Power of Self-Organization**.

Mark Pixley is an organizational change facilitator/consultant and works with senior managers in Asia to design and facilitate their organization's change processes. He is a General Manager of **LEADERSHIP INC** which focused on "Facilitating Organizational Change in Greater China." He has fifteen years experience in Asia, living in Hong Kong, Taiwan and China and holds a MBA from NYU.

Preparation
